# Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2004 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

**Adhesives**

Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).

**Amplification**

Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

**Arches**

Assessment of Multispan Masonry Arch Bridges. I: Simplified Approach. — Antonio Brencich and Ugo De Francesco; 9(6), 582-90 (2004).

Assessment of Multispan Masonry Arch Bridges. II: Examples and Applications. — Antonio Brencich and Ugo De Francesco; 9(6), 591-8 (2004).

**Assessment**

Rapid and Global Bridge Assessment for the Military. — James Ray and Cary D. Butler; 9(6), 550-7 (2004).

**Base isolation**

Influence of Pier Stiffness Degradation on Soil-Structure Interaction in Base-Isolated Bridges. — Muhammad Tariq Amin Chaudhary; 9(3), 287-96 (2004).

**Beams**

Timoshenko Beam with Tuned Mass Dampers to Moving Loads. — Yung-Hsiang Chen and Ding-Shin Chen; 9(2), 167-77 (2004).

Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).

**Bearing capacity**

Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

Bridge Structural Condition Assessment Using Systematically Validated Finite-Element Model. — Pin-Qi Xia and James M. W. Brownjohn; 9(5), 418-23 (2004).

Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).

Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

Rapid and Global Bridge Assessment for the Military. — James Ray and Cary D. Butler; 9(6), 550-7 (2004).

Assessment of Multispan Masonry Arch Bridges. I: Simplified Approach. — Antonio Brencich and Ugo De Francesco; 9(6), 582-90 (2004).

Assessment of Multispan Masonry Arch Bridges. II: Examples and Applications. — Antonio Brencich and Ugo De Francesco; 9(6), 591-8 (2004).

**Bearings**

Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).

**Bending**

Bending Behavior of Steel Pipe Girders Filled with Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).

Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (A) (2004).

**Bending moments**

Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Box girders**

Shear Lag Effect in Simply Supported Prestressed Concrete Box Girder. — Shih Toh Chang; 9(2), 178-84 (2004).

**Brick masonry**

Assessment of Multispan Masonry Arch Bridges. I: Simplified Approach. — Antonio Brencich and Ugo De Francesco; 9(6), 582-90 (2004).

Assessment of Multispan Masonry Arch Bridges. II: Examples and Applications. — Antonio Brencich and Ugo De Francesco; 9(6), 591-8 (2004).

**Bridge abutments**

Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).

Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Bridge construction**

High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).

Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).

**Bridge decks**

Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).

Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).

Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).

Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

Fatigue and Strength Performance of Concrete-Filled Steel-Grid Bridge Deck. — B. G. Claybaugh, C. J. Earls, and A. K. Ahmadi; 9(5), 435-43 (2004).

Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (A) (2004).

**Bridge design**

Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).

Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

Historical Perspective on Horizontally Curved I Girder Bridge Design in the United States. — D. Linzell, D. Hall, and D. White; 9(3), 218-29 (2004).

Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).

Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).
Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).
Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).
Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Bridge inspection**

Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Bridge maintenance**

Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).
Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Bridge piers**

Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).

**Bridge tests**

Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Bridge towers**

Structural Characteristics and Applicability of Four-Span Suspension Bridge. — Osamu Yoshida, Motoi Okuda, and Takeo Moriya; 9(5), 453-63 (2004).

**Bridges**

Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).
Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).
Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).
Bridge Structural Condition Assessment Using Systematically Validated Finite-Element Model. — Pin-Qi Xia and James M. W. Brownjohn; 9(5), 418-23 (2004).
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (A) (2004).
Rapid and Global Bridge Assessment for the Military. — James Ray and Cary D. Butler; 9(6), 550-7 (2004).
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Bridges, arch**

Load Rating of Masonry Arch Bridges: Refinements. — Thomas E. Boothby and Paul J. Fanning; 9(3), 304-7 (2004).
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).
Assessment of Multispan Masonry Arch Bridges. I: Simplified Approach. — Antonio Brencich and Ugo De Francesco; 9(6), 582-90 (2004).
Assessment of Multispan Masonry Arch Bridges. II: Examples and Applications. — Antonio Brencich and Ugo De Francesco; 9(6), 591-8 (2004).

**Bridges, box girder**

Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

**Bridges, cable-stayed**

Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).

**Bridges, composite**

Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).
Bending Behavior of Steel Pipe Girders Filled with Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

**Bridges, concrete**

Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).
Inelastic Damage Analysis of Reinforced Concrete Bridge Columns Based on Degraded Monotonic Energy. — Riyadh A. Hindi and Robert G. Sexsmith; 9(4), 326-32 (2004).
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Bridges, covered**

Structural Analyses of Two Historic Covered Wooden Bridges. — Dylan M. Lamar and Benjamin W. Schafer; 9(6), 623-33 (A) (2004).

**Bridges, girder**

Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).
Effect of Side Retainers on Seismic Response of Bridges with Elastomeric Bearings. — Shervin Maleki; 9(1), 95-100 (2004).
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).
Historical Perspective on Horizontally Curved I Girder Bridge Design in the United States. — D. Linzell, D. Hall, and D. White; 9(3), 218-29 (2004).
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

Steel Girder Design per AASHTO LRFD Specifications (Part 1). — Gregor P. Wollmann; 9(4), 364-74 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 2). — Gregor P. Wollmann; 9(4), 375-81 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).
Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).
Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (A) (2004).

**Bridges, highway**

Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Bridges, orthotropic**

Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (A) (2004).

**Bridges, piers**

Influence of Pier Stiffness Degradation on Soil-Structure Interaction in Base-Isolated Bridges. — Muhammad Tariq Amin Chaudhary; 9(3), 287-96 (2004).
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Bridges, skew**

Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Bridges, steel**

Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).
Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 1). — Gregor P. Wollmann; 9(4), 364-74 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 2). — Gregor P. Wollmann; 9(4), 375-81 (2004).
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).
Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).
Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).

**Bridges, suspension**

Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).
Structural Characteristics and Applicability of Four-Span Suspension Bridge. — Osamu Yoshida, Motoi Okuda, and Takeo Moriya; 9(5), 453-63 (2004).

**Bridges, wooden**

Creep Effect in Structural Composite Lumber for Bridge Applications. — Nur Yazdani, Eric Johnson, and Shelia Duwadi; 9(1), 87-94 (2004).
Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).
Structural Analyses of Two Historic Covered Wooden Bridges. — Dylan M. Lamar and Benjamin W. Schafer; 9(6), 623-33 (A) (2004).

**Cables**

Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).

**California**

Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).

**Chlorides**

Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Clays**

Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Columns**

Inelastic Damage Analysis of Reinforced Concrete Bridge Columns Based on Degraded Monotonic Energy. — Riyadh A. Hindi and Robert G. Sexsmith; 9(4), 326-32 (2004).
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).

**Composite beams**

Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**Composite columns**

Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).

**Composite materials**

Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).
Creep Effect in Structural Composite Lumber for Bridge Applications. — Nur Yazdani, Eric Johnson, and Shelia Duwadi; 9(1), 87-94 (2004).
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Concrete**

Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).
Bending Behavior of Steel Pipe Girders Filled with

Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).
Fatigue and Strength Performance of Concrete-Filled Steel-Grid Bridge Deck. — B. G. Claybaugh, C. J. Earls, and A. K. Ahmadi; 9(5), 435-43 (2004).
Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).

**Concrete deterioration**

Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

**Concrete slabs**

Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).

**Concrete structures**

Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

**Concrete, prestressed**

Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).
Shear Lag Effect in Simply Supported Prestressed Concrete Box Girder. — Shih Toh Chang; 9(2), 178-84 (2004).
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Concrete, reinforced**

Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).
Influence of Pier Stiffness Degradation on Soil-Structure Interaction in Base-Isolated Bridges. — Muhammad Tariq Amin Chaudhary; 9(3), 287-96 (2004).
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Connections, bolted**

Fatigue of Joints with Staggered Holes. — Georg Josi, Gilbert Y. Grondin, and Geoffrey L. Kulak; 9(6), 614-22 (2004).

**Corrosion**

Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Costs**

Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).

**Creep**

Creep Effect in Structural Composite Lumber for Bridge Applications. — Nur Yazdani, Eric Johnson, and Shelia Duwadi; 9(1), 87-94 (2004).
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Curvature**

Historical Perspective on Horizontally Curved I Girder Bridge Design in the United States. — D. Linzell, D. Hall, and D. White; 9(3), 218-29 (2004).
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).
Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).

**Cyclic loads**

Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).
Inelastic Damage Analysis of Reinforced Concrete Bridge Columns Based on Degraded Monotonic Energy. — Riyadh A. Hindi and Robert G. Sexsmith; 9(4), 326-32 (2004).

**Cyclic tests**

Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).

**Dam foundations**

Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Damage**

Bridge Structural Condition Assessment Using Systematically Validated Finite-Element Model. — Pin-Qi Xia and James M. W. Brownjohn; 9(5), 418-23 (2004).

**Damping**

Timoshenko Beam with Tuned Mass Dampers to Moving Loads. — Yung-Hsiang Chen and Ding-Shin Chen; 9(2), 167-77 (2004).

**Dead loads**

Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).
Shear Lag Effect in Simply Supported Prestressed Concrete Box Girder. — Shih Toh Chang; 9(2), 178-84 (2004).

**Deflection**

Creep Effect in Structural Composite Lumber for Bridge Applications. — Nur Yazdani, Eric Johnson, and Shelia Duwadi; 9(1), 87-94 (2004).
Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).
Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (A) (2004).

**Deformation**

Structural Characteristics and Applicability of Four-Span Suspension Bridge. — Osamu Yoshida, Motoi Okuda, and Takeo Moriya; 9(5), 453-63 (2004).

**Design**

Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).

**Design criteria**

Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).

**Design/build**

Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Deterioration**

Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Displacement**

Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).

**Ductility**

Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Earthquake damage**

Inelastic Damage Analysis of Reinforced Concrete Bridge Columns Based on Degraded Monotonic Energy. — Riyadh A. Hindi and Robert G. Sexsmith; 9(4), 326-32 (2004).
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).

**Earthquakes**

Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).
Influence of Pier Stiffness Degradation on Soil-

Structure Interaction in Base-Isolated Bridges. — Muhammad Tariq Amin Chaudhary; 9(3), 287-96 (2004).
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Elastomer**
Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).

**Equilibrium**
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).

**Evaluation**
Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Excitation**
Timoshenko Beam with Tuned Mass Dampers to Moving Loads. — Yung-Hsiang Chen and Ding-Shin Chen; 9(2), 167-77 (2004).

**Experimentation**
Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).

**Failures**
Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).

**Fatigue**
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).
Fatigue and Strength Performance of Concrete-Filled Steel-Grid Bridge Deck. — B. G. Claybaugh, C. J. Earls, and A. K. Ahmadi; 9(5), 435-43 (2004).
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).
Fatigue of Joints with Staggered Holes. — Georg Josi, Gilbert Y. Grondin, and Geoffrey L. Kulak; 9(6), 614-22 (2004).

**Fatigue tests**
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**Federal agencies**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (A) (2004).

**Fiber reinforced materials**
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Fiber reinforced plastics**
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Fiber reinforced polymers**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).
Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).

**Field tests**
Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).

**Finite element method**
Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).
Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).
Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).
Bridge Structural Condition Assessment Using Systematically Validated Finite-Element Model. — Pin-Qi Xia and James M. W. Brownjohn; 9(5), 418-23 (2004).
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).
Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).

**Finite elements**
Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

**Flexural strength**
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).

**Footings**
Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).

**Fractures**
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).

**Glass fibers**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).

**Glue laminated materials**
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**Ground motion**
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Guidelines**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).

**H piles**
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Hazards**
Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).

**High strength steel**
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

**Highway**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).

**Highway, deflection**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (A) (2004).

**Historic sites**
Structural Analyses of Two Historic Covered Wooden Bridges. — Dylan M. Lamar and Benjamin W. Schafer; 9(6), 623-33 (A) (2004).

**History**
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

**Holes**
Fatigue of Joints with Staggered Holes. — Georg Josi, Gilbert Y. Grondin, and Geoffrey L. Kulak; 9(6), 614-22 (2004).

**Honeycomb structures**
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).

**I beams**
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).

**Impact force**
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

**Inelastic action**
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).
Inelastic Damage Analysis of Reinforced Concrete Bridge Columns Based on Degraded Monotonic Energy. — Riyadh A. Hindi and Robert G. Sexsmith; 9(4), 326-32 (2004).
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Instrumentation**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (A) (2004).

**Integrals**
Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).

**Interactions**
Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).

**Italy**
Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).
Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Joints**
Fatigue of Joints with Staggered Holes. — Georg Josi, Gilbert Y. Grondin, and Geoffrey L. Kulak; 9(6), 614-22 (2004).

**Kentucky**
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Laminated wood**
Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**Lasers**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (A) (2004).

**Lateral displacement**
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Lateral loads**
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Lead**
Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).

**Length**
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Life cycle cost**
Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

**Live loads**
Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).
Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Load and resistance factor design**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).
Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 1). — Gregor P. Wollmann; 9(4), 364-74 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 2). — Gregor P. Wollmann; 9(4), 375-81 (2004).
Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (A) (2004).

**Load distribution**
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).
Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Load factors**
Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).

**Load tests**
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (A) (2004).

**Maintenance**
Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

**Masonry**
Load Rating of Masonry Arch Bridges: Refinements. — Thomas E. Boothby and Paul J. Fanning; 9(3), 304-7 (2004).

**Mathematical models**
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**Maximum loads**
Load Rating of Masonry Arch Bridges: Refinements. — Thomas E. Boothby and Paul J. Fanning; 9(3), 304-7 (2004).

**Measurement**
Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).

**Military engineering**
Rapid and Global Bridge Assessment for the Military. — James Ray and Cary D. Butler; 9(6), 550-7 (2004).

**Model analysis**
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).

**Models**
Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).

**Moment distribution**
Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).

**Monitoring**
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).

**Mortars**
Bending Behavior of Steel Pipe Girders Filled with Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).

**Natural frequency**
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Neural networks**
Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).

**Nondestructive tests**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (A) (2004).

**Nonlinear analysis**
Effect of Side Retainers on Seismic Response of Bridges with Elastomeric Bearings. — Shervin Maleki; 9(1), 95-100 (2004).

**Numerical analysis**
Assessment of Multispan Masonry Arch Bridges. I: Simplified Approach. — Antonio Brencich and Ugo De Francesco; 9(6), 582-90 (2004).
Assessment of Multispan Masonry Arch Bridges. II: Examples and Applications. — Antonio Brencich and Ugo De Francesco; 9(6), 591-8 (2004).

**Ohio**
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Parameters**
Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).

**Pennsylvania**
Structural Analyses of Two Historic Covered Wooden Bridges. — Dylan M. Lamar and Benjamin W. Schafer; 9(6), 623-33 (A) (2004).

**Performance evaluation**
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Piles**
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Plastic hinges**
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Plates**
Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (A) (2004).

**Post tensioning**
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Pressure measurement**
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Project feasibility**
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).

**Pseudodynamic method**
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).

**Rehabilitation**
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).
Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).

**Reliability**
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Research**
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

**Retaining walls**
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Retrofitting**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Rigidity**
Structural Characteristics and Applicability of Four-Span Suspension Bridge. — Osamu Yoshida, Motoi Okuda, and Takeo Moriya; 9(5), 453-63 (2004).

**Rock structures**
Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Rockslides**
Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Routing**
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**San Francisco**
Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).

**Sandwich panels**
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).

**Seismic effects**
Effect of Side Retainers on Seismic Response of Bridges with Elastomeric Bearings. — Shervin Maleki; 9(1), 95-100 (2004).

**Seismic hazard**
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Seismic isolation**
Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).

**Seismic response**
Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Shear flow**
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**Shear forces**
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Shear lag**
Shear Lag Effect in Simply Supported Prestressed Concrete Box Girder. — Shih Toh Chang; 9(2), 178-84 (2004).

**Shear strength**
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).

**Sheets**
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).

**Shrinkage**
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Soil-structure interaction**
Influence of Pier Stiffness Degradation on Soil-Structure Interaction in Base-Isolated Bridges. — Muhammad Tariq Amin Chaudhary; 9(3), 287-96 (2004).
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Specifications**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 1). — Gregor P. Wollmann; 9(4), 364-74 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 2). — Gregor P. Wollmann; 9(4), 375-81 (2004).

**Static loads**
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).

**Steel**
Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).
Fatigue and Strength Performance of Concrete-Filled Steel-Grid Bridge Deck. — B. G. Claybaugh, C. J. Earls, and A. K. Ahmadi; 9(5), 435-43 (2004).
Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).

**Steel beams**
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).

**Steel pipes**
Bending Behavior of Steel Pipe Girders Filled with Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).

**Steel plates**
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).

**Stiffness**
Influence of Pier Stiffness Degradation on Soil-Structure Interaction in Base-Isolated Bridges. — Muhammad Tariq Amin Chaudhary; 9(3), 287-96 (2004).
Bridge Structural Condition Assessment Using Systematically Validated Finite-Element Model. — Pin-Qi Xia and James M. W. Brownjohn; 9(5), 418-23 (2004).

**Stress**
Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).

**Structural analysis**
Timoshenko Beam with Tuned Mass Dampers to Moving Loads. — Yung-Hsiang Chen and Ding-Shin Chen; 9(2), 167-77 (2004).
Structural Analyses of Two Historic Covered Wooden Bridges. — Dylan M. Lamar and Benjamin W. Schafer; 9(6), 623-33 (A) (2004).

**Structural behavior**
Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).

**Superstructures**
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).

**Surface roughness**
Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

**Switzerland**
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Taiwan**
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).

**Temperature effects**
Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Tests**
Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).

**Thermal analysis**
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Three-dimensional models**
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).

**Timber construction**
Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).

**Torsion**
Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).

**Toughness**
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).

**Trucks**
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

**United States**
Historical Perspective on Horizontally Curved I Girder Bridge Design in the United States. — D. Linzell, D. Hall, and D. White; 9(3), 218-29 (2004).

Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).

Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Urban areas**

Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).

**Utah**

Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Vehicles**

Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).

**Vibration**

Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).

Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Warpage**

Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).

**Wood beams**

Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).

**Wooden structures**

Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).

# Author Index

**Adams, Teresa M.**
Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

**Adeli, Hojjat**
Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).

**Adey, Bryan**
Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Ahmadi, A. K.**
Fatigue and Strength Performance of Concrete-Filled Steel-Grid Bridge Deck. — B. G. Claybaugh, C. J. Earls, and A. K. Ahmadi; 9(5), 435-43 (2004).

**Alameddine, Fadel**
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Albhaisi, Suhail M.**
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Anderson, Ralph E.**
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Arockiasamy, M.**
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Arsoy, S.**
Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).

**Aschheim, Mark**
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).

**Ashour, Mohamed**
Closure to "Strain Wedge Model Capability of Analyzing Behavior of Laterally Loaded Isolated Piles, Drilled Shafts, and Pile Groups" by Mohamed Ashour, Gary Norris, and Patrick Pilling. — Mohamed Ashour and Gary Norris; 9(3), 311 (2004).

**Awwad, E.**
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).

**Azizinamini, Atorod**
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

**Bailey, Simon F.**
Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

**Banthia, Nemy**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).

**Barker, Michael G.**
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).

**Barker, R. M.**
Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).

**Barth, Karl**
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

**Barth, Karl E.**
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).
Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).

**Baseheart, T. M.**
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Béguin, Gilbert H.**
Discussion of "Noncontact Photogrammetric Measurement of Vertical Bridge Deflection" by David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch. — Gilbert H. Béguin; 9(5), 507 (2004).

**Bergman, Adam**
Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).

**Bettinger, Christopher**
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Billington, S. L.**
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Blandford, George E.**
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Bobisut, Carlo**
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Boothby, Thomas E.**
Load Rating of Masonry Arch Bridges: Refinements. — Thomas E. Boothby and Paul J. Fanning; 9(3), 304-7 (2004).

**Boyd, Andrew**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).

**Brencich, Antonio**
Assessment of Multispan Masonry Arch Bridges. I: Simplified Approach. — Antonio Brencich and Ugo De Francesco; 9(6), 582-90 (2004).
Assessment of Multispan Masonry Arch Bridges. II: Examples and Applications. — Antonio Brencich and Ugo De Francesco; 9(6), 591-8 (2004).

**Broquet, Claude**
Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

**Brownjohn, James M. W.**
Bridge Structural Condition Assessment Using Systematically Validated Finite-Element Model. — Pin-Qi Xia and James M. W. Brownjohn; 9(5), 418-23 (2004).

**Brühwiler, Eugen**
Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).
Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).

Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Bruneau, Michel**
Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).

**Buckle, Ian G.**
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).

**Butler, Cary D.**
Rapid and Global Bridge Assessment for the Military. — James Ray and Cary D. Butler; 9(6), 550-7 (2004).

**Butrieng, Narongrit**
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Cai, Chun S.**
Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).

**Carden, Lyle**
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).

**Cardinale, Giovanni**
Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).

**Chajes, Michael J.**
Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).

**Chang, I-Shang**
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).

**Chang, K. C.**
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).

**Chang, Shih Toh**
Shear Lag Effect in Simply Supported Prestressed Concrete Box Girder. — Shih Toh Chang; 9(2), 178-84 (2004).

**Chang, Shuenn-Yih**
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).

**Chase, S. B.**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (2004).

**Chaudhary, Muhammad Tariq Amin**
Influence of Pier Stiffness Degradation on Soil-Structure Interaction in Base-Isolated Bridges. — Muhammad Tariq Amin Chaudhary; 9(3), 287-96 (2004).

**Chen, C. C.**
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).

**Chen, Chun-Ray**
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).

**Chen, Ding-Shin**
Timoshenko Beam with Tuned Mass Dampers to Moving Loads. — Yung-Hsiang Chen and Ding-Shin Chen; 9(2), 167-77 (2004).

**Chen, Yung-Hsiang**
Timoshenko Beam with Tuned Mass Dampers to Moving Loads. — Yung-Hsiang Chen and Ding-Shin Chen; 9(2), 167-77 (2004).

**Choi, Eunsoo**
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Chou, C. C.**
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).

**Claybaugh, B. G.**
Fatigue and Strength Performance of Concrete-Filled Steel-Grid Bridge Deck. — B. G. Claybaugh, C. J. Earls, and A. K. Ahmadi; 9(5), 435-43 (2004).

**Dagher, Habib J.**
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**Davids, William G.**
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**De Francesco, Ugo**
Assessment of Multispan Masonry Arch Bridges. I: Simplified Approach. — Antonio Brencich and Ugo De Francesco; 9(6), 582-90 (2004).
Assessment of Multispan Masonry Arch Bridges. II: Examples and Applications. — Antonio Brencich and Ugo De Francesco; 9(6), 591-8 (2004).

**DesRoches, Reginald**
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Dexter, Robert**
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

**Dexter, Robert J.**
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).

**Dicleli, Murat**
Estimation of Length Limits for Integral Bridges Built on Clay. — Murat Dicleli and Suhail M. Albhaisi; 9(6), 572-81 (2004).

**Duncan, J. M.**
Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading. — S. Arsoy, J. M. Duncan, and R. M. Barker; 9(2), 193-9 (2004).

**Duwadi, Shelia**
Creep Effect in Structural Composite Lumber for Bridge Applications. — Nur Yazdani, Eric Johnson, and Shelia Duwadi; 9(1), 87-94 (2004).

**Dyke, Shirley J.**
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).

**Earls, C. J.**
Fatigue and Strength Performance of Concrete-Filled Steel-Grid Bridge Deck. — B. G. Claybaugh, C. J. Earls, and A. K. Ahmadi; 9(5), 435-43 (2004).

**Earls, Christopher J.**
Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).

**Edberg, William**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).

**El-Tawil, Sherif**
Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).

**Fafard, Mario**
Dynamic Behavior of Deck Slabs of Concrete Road Bridges. — Claude Broquet, Simon F. Bailey, Mario Fafard, and Eugen Brühwiler; 9(2), 137-46 (2004).

**Fang, I-Kuang**
Field Static Load Test on Kao-Ping-Hsi Cable-Stayed Bridge. — I-Kuang Fang, Chun-Ray Chen, and I-Shang Chang; 9(6), 531-40 (2004).

**Fanning, Paul J.**
Load Rating of Masonry Arch Bridges: Refinements. — Thomas E. Boothby and Paul J. Fanning; 9(3), 304-7 (2004).

**Fisher, John W.**
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).

**Fuchs, P. A.**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (2004).

**Fujino, Yozo**
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).

**Graybeal, Benjamin A.**
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Grondin, Gilbert Y.**
Fatigue of Joints with Staggered Holes. — Georg Josi, Gilbert Y. Grondin, and Geoffrey L. Kulak; 9(6), 614-22 (2004).

**Hajdin, Rade**
Effect of Common Cause Failures on Indirect Costs. — Bryan Adey, Rade Hajdin, and Eugen Brühwiler; 9(2), 200-8 (2004).
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Hall, D.**
Historical Perspective on Horizontally Curved I Girder Bridge Design in the United States. — D. Linzell, D. Hall, and D. White; 9(3), 218-29 (2004).

**Harik, Issam E.**
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Hartnagel, Bryan A.**
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).

**Higgins, Christopher**
Orthotropic Plate Model for Estimating Deflections in Filled Grid Decks. — Christopher Higgins; 9(6), 599-605 (2004).

**Hindi, Riyadh A.**
Inelastic Damage Analysis of Reinforced Concrete Bridge Columns Based on Degraded Monotonic Energy. — Riyadh A. Hindi and Robert G. Sexsmith; 9(4), 326-32 (2004).

**Hosaka, Tetsuya**
Bending Behavior of Steel Pipe Girders Filled with Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).

**Huang, Haoxiong**
Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).

**Huang, Ying-Hua**
Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

**Huo, Xiaoming Sharon**
Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).

**Imbsen, Roy**
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Itani, Ahmad M.**
Seismic Behavior of Steel Girder Bridge Superstructures. — Ahmad M. Itani, Michel Bruneau, Lyle Carden, and Ian G. Buckle; 9(3), 243-9 (2004).

**Iwasaki, Eiji**
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).

**Jabakhanji, R.**
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).

**Jangid, R. S.**
Seismic Response of Isolated Bridges. — R. S. Jangid; 9(2), 156-66 (2004).

**Jáuregui, David V.**
Closure to "Noncontact Photogrammetric Measurement of Vertical Bridge Deflection" by David V. Jáuregui, Kenneth R. White, Clinton B. Woodward, and Kenneth R. Leitch. — David V. Jáuregui; 9(5), 507 (2004).

**Johnson, Eric**
Creep Effect in Structural Composite Lumber for Bridge Applications. — Nur Yazdani, Eric Johnson, and Shelia Duwadi; 9(1), 87-94 (2004).

**Johnson, Martin**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).

**Johnston, Thomas R., Jr.**
Behavior of Field Splice Details in Precast Concrete-Filled Steel Grid Bridge Deck. — Christopher J. Earls and Thomas R. Johnston, Jr.; 9(2), 127-36 (2004).

**Josi, Georg**
Fatigue of Joints with Staggered Holes. — Georg Josi, Gilbert Y. Grondin, and Geoffrey L. Kulak; 9(6), 614-22 (2004).

**Kalny, Ondrej**
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).

**Kennedy, John B.**
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

**Khayyat, Salah Y.**
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Kocsis, Peter**
Discussion of "Strain Wedge Model Capability of Analyzing Behavior of Laterally Loaded Isolated Piles, Drilled Shafts, and Pile Groups" by Mohamed Ashour, Gary Norris, and Patrick Pilling. — Peter Kocsis; 9(3), 310-1 (2004).
Discussion of "Deflection Requirements for Bridges Constructed with Advanced Composite Materials" by J. R. Demitz, D. R. Mertz, and J. W. Gillespie. — Peter Kocsis; 9(4), 414 (2004).

**Kulak, Geoffrey L.**
Fatigue of Joints with Staggered Holes. — Georg Josi, Gilbert Y. Grondin, and Geoffrey L. Kulak; 9(6), 614-22 (2004).

**Lai, L. C.**
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).

**Lamar, Dylan M.**
Structural Analyses of Two Historic Covered Wooden Bridges. — Dylan M. Lamar and Benjamin W. Schafer; 9(6), 623-33 (2004).

**Lenett, M.**
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Leon, R. T.**
Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).

**Leon, Roberto T.**
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. I: As Built. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, Shirley J. Dyke, and Mark Aschheim; 9(5), 464-72 (2004).
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Li, Yeou-Fong**
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).

**Linzell, D.**
Historical Perspective on Horizontally Curved I Girder Bridge Design in the United States. — D. Linzell, D. Hall, and D. White; 9(3), 218-29 (2004).
Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).

**Loh, Chin-Hsiung**
Experimental Study of Seismic Behaviors of As-Built and Carbon Fiber Reinforced Plastics Repaired Reinforced Concrete Bridge Columns. — Shuenn-Yih Chang, Yeou-Fong Li, and Chin-Hsiung Loh; 9(4), 391-402 (2004).

**Mabsout, M.**
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).

**Maleki, Shervin**
Effect of Side Retainers on Seismic Response of Bridges with Elastomeric Bearings. — Shervin Maleki; 9(1), 95-100 (2004).

**Mammino, Armando**
Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Manzanarez, Rafael**
Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).

**Marson, Julia**
Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail. — Julia Marson and Michel Bruneau; 9(1), 14-23 (2004).
Seismic Design of Concrete-Filled Circular Steel Bridge Piers. — Michel Bruneau and Julia Marson; 9(1), 24-34 (2004).

**Mertz, Dennis**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).

**Mertz, Dennis R.**
State of the Art in Steel-Bridge Construction. — Dennis R. Mertz; 9(3), 209 (2004).

**Minervino, Charles**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).

**Mo, Y. L.**
Lessons Learned from the Damaged Chi-Lu Cable-Stayed Bridge. — K. C. Chang, Y. L. Mo, C. C. Chen, L. C. Lai, and C. C. Chou; 9(4), 343-52 (2004).

**Modena, Claudio**
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Moore, M.**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (2004).

**Moore, Mark**
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Moriya, Takeo**
Structural Characteristics and Applicability of Four-Span Suspension Bridge. — Osamu Yoshida, Motoi Okuda, and Takeo Moriya; 9(5), 453-63 (2004).

**Moses, Fred**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).

**Nader, Marwan**
Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).

**Nagai, Masatsugu**
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).

**Nakamura, Shun-ichi**
Bending Behavior of Steel Pipe Girders Filled with Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).

**Nishiumi, Kenji**
Bending Behavior of Steel Pipe Girders Filled with Ultralight Mortar. — Shun-ichi Nakamura, Tetsuya Hosaka, and Kenji Nishiumi; 9(3), 297-303 (2004).

**Norris, Gary**
Closure to "Strain Wedge Model Capability of Analyzing Behavior of Laterally Loaded Isolated Piles, Drilled Shafts, and Pile Groups" by Mohamed Ashour, Gary Norris, and Patrick Pilling. — Mohamed Ashour and Gary Norris; 9(3), 311 (2004).

**Okeil, Ayman M.**
Warping Stresses in Curved Box Girder Bridges: Case Study. — Ayman M. Okeil and Sherif El-Tawil; 9(5), 487-96 (2004).

**Okuda, Motoi**
Structural Characteristics and Applicability of Four-Span Suspension Bridge. — Osamu Yoshida, Motoi Okuda, and Takeo Moriya; 9(5), 453-63 (2004).

**Orlando, Maurizio**
Structural Evaluation and Strengthening of a Reinforced Concrete Bridge. — Giovanni Cardinale and Maurizio Orlando; 9(1), 35-42 (2004).

**Pantelides, Chris P.**
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Pellegrino, Carlo**
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Peterman, Robert J.**
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).

**Peterson, Bruce E.**
Congratulations. — Bruce E. Peterson; 9(1), 1 (2004).
Editor's Note. — Bruce E. Peterson; 9(1), 2-3 (2004).
Report for 2003 and the Start of a New Year. — Bruce E. Peterson; 9(2), 107 (2004).
Editor's Note. — Bruce E. Peterson; 9(2), 108 (2004).
Editor's Note. — Bruce E. Peterson; 9(3), 210 (2004).
Call for Associate Editors and Reviewers. — Bruce E. Peterson; 9(4), 313 (2004).
Editor's Note. — Bruce E. Peterson; 9(4), 314 (2004).
Call for Associate Editors and Reviewers. — Bruce E. Peterson; 9(5), 415 (2004).
Editor's Note. — Bruce E. Peterson; 9(5), 416 (2004).
Editor's Note. — Bruce E. Peterson; 9(6), 509-10 (2004).

**Pfeifer, Thomas A.**
Seismic Response of Multiple Span Steel Bridges in Central and Southeastern United States. II: Retrofitted. — Reginald DesRoches, Eunsoo Choi, Roberto T. Leon, and Thomas A. Pfeifer; 9(5), 473-9 (2004).

**Phares, Brent M.**
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Pincheira, José A.**
Analysis of Life-Cycle Maintenance Strategies for Concrete Bridge Decks. — Ying-Hua Huang, Teresa M. Adams, and José A. Pincheira; 9(3), 250-8 (2004).

**Ramirez, Guillermo**
Performance Evaluation of Repair Technique for Damaged Fiber-Reinforced Polymer Honeycomb Bridge Deck Panels. — Ondrej Kalny, Robert J. Peterman, and Guillermo Ramirez; 9(1), 75-86 (2004).

**Ray, James**
Rapid and Global Bridge Assessment for the Military. — James Ray and Cary D. Butler; 9(6), 550-7 (2004).

**Reed, Calvin E.**
Evaluation of Prestressed Concrete Girders Strengthened with Carbon Fiber Reinforced Polymer Sheets. — Calvin E. Reed and Robert J. Peterman; 9(2), 185-92 (2004).

**Ren, Wei-Xin**
Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response. — Wei-Xin Ren, George E. Blandford, and Issam E. Harik; 9(2), 110-8 (2004).
Roebling Suspension Bridge. II: Ambient Testing and Live-Load Response. — Wei-Xin Ren, Issam E. Harik, George E. Blandford, M. Lenett, and T. M. Baseheart; 9(2), 119-26 (2004).

**Riechers, Kevin L.**
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Roeder, Charles W.**
Effect of Live-Load Deflections on Steel Bridge Performance. — Charles W. Roeder, Karl E. Barth, and Adam Bergman; 9(3), 259-67 (2004).

**Roelfstra, Guido**
Condition Evolution in Bridge Management Systems and Corrosion-Induced Deterioration. — Guido Roelfstra, Rade Hajdin, Bryan Adey, and Eugen Brühwiler; 9(3), 268-77 (2004).

**Rolander, Dennis D.**
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Ross, Sherrill**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).

**Rubeiz, Camille**
High Performance Steel: Research Front—Historical Account of Research Activities. — Atorod Azizinamini, Karl Barth, Robert Dexter, and Camille Rubeiz; 9(3), 212-7 (2004).

**Sardo, Tom**
Seismic Retrofit of State Street Bridge on Interstate 80. — Chris P. Pantelides, Fadel Alameddine, Tom Sardo, and Roy Imbsen; 9(4), 333-42 (2004).

**Sargand, Shad M.**
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Schafer, Benjamin W.**
Structural Analyses of Two Historic Covered Wooden Bridges. — Dylan M. Lamar and Benjamin W. Schafer; 9(6), 623-33 (2004).

**Sennah, Khaled M.**
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

**Sexsmith, Robert**
Potential Retrofit Methods for Concrete Channel Beam Bridges Using Glass Fiber Reinforced Polymer. — Sherrill Ross, Andrew Boyd, Martin Johnson, Robert Sexsmith, and Nemy Banthia; 9(1), 66-74 (2004).

**Sexsmith, Robert G.**
Inelastic Damage Analysis of Reinforced Concrete Bridge Columns Based on Degraded Monotonic Energy. — Riyadh A. Hindi and Robert G. Sexsmith; 9(4), 326-32 (2004).

**Shahawy, Mohsen**
Predicted and Measured Performance of Prestressed Concrete Bridges. — Chun S. Cai and Mohsen Shahawy; 9(1), 4-13 (2004).

**Shenton, Harry W.**
Load Distribution for a Highly Skewed Bridge: Testing and Analysis. — Haoxiong Huang, Harry W. Shenton, and Michael J. Chajes; 9(6), 558-62 (2004).

**Shmulsky, Rubin**
Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples. — Rubin Shmulsky; 9(3), 308-9 (2004).

**Sirca, Gene F., Jr.**
Counterpropagation Neural Network Model for Steel Girder Bridge Structures. — Gene F. Sirca, Jr., and Hojjat Adeli; 9(1), 55-65 (2004).

**Sivakumar, Bala**
New AASHTO Guide Manual for Load and Resistance Factor Rating of Highway Bridges. — Charles Minervino, Bala Sivakumar, Fred Moses, Dennis Mertz, and William Edberg; 9(1), 43-54 (2004).

**Sivakumar, M.**
State-of-the-Art of Integral Abutment Bridges: Design and Practice. — M. Arockiasamy, Narongrit Butrieng, and M. Sivakumar; 9(5), 497-506 (2004).

**Steinberg, Eric**
Forces in Wingwalls of Skewed Semi-Integral Bridges. — Eric Steinberg, Shad M. Sargand, and Christopher Bettinger; 9(6), 563-71 (2004).

**Sun, John**
Suspension Cable Design of the New San Francisco–Oakland Bay Bridge. — John Sun, Rafael Manzanarez, and Marwan Nader; 9(1), 101-6 (2004).

**Tarhini, K.**
Wheel Load Distribution in Simply Supported Concrete Slab Bridges. — M. Mabsout, K. Tarhini, R. Jabakhanji, and E. Awwad; 9(2), 147-55 (2004).

**Tobias, Daniel H.**
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Tonon, Fulvio**
Replacement of Pontesei Bridge, Italy. — Armando Mammino and Fulvio Tonon; 9(5), 480-6 (2004).

**Uzman, Zeyn B.**
Simplified AASHTO Load and Resistance Factor Design Girder Live Load Distribution in Illinois. — Daniel H. Tobias, Ralph E. Anderson, Salah Y. Khayyat, Zeyn B. Uzman, and Kevin L. Riechers; 9(6), 606-13 (2004).

**Washer, G. A.**
Applications of Laser-Based Instrumentation for Highway Bridges. — P. A. Fuchs, G. A. Washer, S. B. Chase, and M. Moore; 9(6), 541-9 (2004).

**Washer, Glenn A.**
Routine Highway Bridge Inspection Condition Documentation Accuracy and Reliability. — Brent M. Phares, Glenn A. Washer, Dennis D. Rolander, Benjamin A. Graybeal, and Mark Moore; 9(4), 403-13 (2004).

**Wasserman, Edward P.**
Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).

**Weaver, Craig A.**
Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders. — Craig A. Weaver, William G. Davids, and Habib J. Dagher; 9(4), 316-25 (2004).

**White, D.**
Historical Perspective on Horizontally Curved I Girder Bridge Design in the United States. — D. Linzell, D. Hall, and D. White; 9(3), 218-29 (2004).

**White, Donald W.**
Recommended Procedures for Simplified Inelastic Design of Steel I-Girder Bridges. — Karl E. Barth, Bryan A. Hartnagel, Donald W. White, and Michael G. Barker; 9(3), 230-42 (2004).

**Wollmann, Gregor P.**
Steel Girder Design per AASHTO LRFD Specifications (Part 1). — Gregor P. Wollmann; 9(4), 364-74 (2004).
Steel Girder Design per AASHTO LRFD Specifications (Part 2). — Gregor P. Wollmann; 9(4), 375-81 (2004).

**Wright, William J.**
Fatigue and Fracture of Steel Girders. — Robert J. Dexter, William J. Wright, and John W. Fisher; 9(3), 278-86 (2004).

**Xia, Pin-Qi**
Bridge Structural Condition Assessment Using Systematically Validated Finite-Element Model. — Pin-Qi Xia and James M. W. Brownjohn; 9(5), 418-23 (2004).

**Yamaguchi, Hiroki**
Feasibility of a 1,400 m Span Steel Cable-Stayed Bridge. — Masatsugu Nagai, Yozo Fujino, Hiroki Yamaguchi, and Eiji Iwasaki; 9(5), 444-52 (2004).

**Yazdani, Nur**
Creep Effect in Structural Composite Lumber for Bridge Applications. — Nur Yazdani, Eric Johnson, and Shelia Duwadi; 9(1), 87-94 (2004).

**Yoon, J. K.**
Cyclic Response of Unbonded Posttensioned Precast Columns with Ductile Fiber-Reinforced Concrete. — S. L. Billington and J. K. Yoon; 9(4), 353-63 (2004).

**Yoshida, Osamu**
Structural Characteristics and Applicability of Four-Span Suspension Bridge. — Osamu Yoshida, Motoi Okuda, and Takeo Moriya; 9(5), 453-63 (2004).

**Zanardo, Giovanna**
Performance Evaluation of Short Span Reinforced Concrete Arch Bridges. — Giovanna Zanardo, Carlo Pellegrino, Carlo Bobisut, and Claudio Modena; 9(5), 424-34 (2004).

**Zhang, Xuesheng**
Impact Factors for Horizontally Curved Composite Box Girder Bridges. — Khaled M. Sennah, Xuesheng Zhang, and John B. Kennedy; 9(6), 512-20 (2004).

**Zhu, Pingsheng**
Simplified Method of Lateral Distribution of Live Load Moment. — Xiaoming Sharon Huo, Edward P. Wasserman, and Pingsheng Zhu; 9(4), 382-90 (2004).

**Zureick, A. H.**
Experimental and Analytical Studies of a Horizontally Curved Steel I-Girder Bridge during Erection. — D. Linzell, R. T. Leon, and A. H. Zureick; 9(6), 521-30 (2004).
